

CYBER RANGE

ASSEMBLE YOUR TEAM. BRAVE THE BATTLEFIELD.

RULE THE RANGE.

Are you ready to take your cyber exercises to the next level?

WWT's Cyber Range Capture The Flag events are dynamic, live-fire cyber exercises designed to give your security teams the real-world training they need to sharpen their cybersecurity skills and increase vigilance in an ever-evolving threat landscape.

Hosted virtually in our state-of-the-art Advanced Technology Center (ATC), Cyber Range pairs real-world, hands-on learning with fun, entertaining gameplay on a scalable platform that can facilitate any type of force-on-force simulation.

Test and evaluate advanced cyber technologies to increase resiliency.

Develop and enhance skillsets for emerging tools and solutions to bolster your capabilities.

Assess individual skills and identify gaps on your teams to strengthen your posture.

Establish chemistry among your cyber teams to fortify your operations.

Your security stack is only as good as the people who use it.

WWT's Cyber Range provides your operations team unprecedented training and access to a suite of commercial tools that are actually used in a real-world cyber incident.

Customers can also leverage WWT's Advanced Technology Center (ATC) support staff, and our expansive list of OEM partnerships, to build their own customized cyber range environment to suit their unique needs.

Do you have what it takes to rule the range?

Our Catalog of Scenarios

BLUE TEAM

SCENARIO: A nefarious, secret collective of bad actors and hackers have infiltrated a global financial services firm that is enlisting your help to mitigate the imminent threat and avert economic catastrophe.

OBJECTIVE: Using any means necessary, your team has 72 hours to scan your organization's environment, identify compromised systems and footholds, and brief your leadership team on how best to mitigate or eliminate the breach.

LOGISTICS: This will be a multi-day experience that can accommodate individuals or teams from different geographies. Cyber Range teams — comprised of teams of three to four participants — will be pitted against one another in a point-style competition, and the team with the most points at the end wins. Cyber Range is hosted in WWT's Advanced Technology Center (ATC) and has been built to accommodate even the most complex and demanding security environments.

Though this event lasts 72-hours, it is designed to be completed in a 12-16 hour period. The larger block of time provides your team with the flexibility to participate at a time and pace that works best for your team.

RED TEAM

SCENARIO: You and your team are being recruited by a nefarious, secret collective of bad actors and hackers that seek to thwart government regulations and competitive business to make way for their own business interests.

OBJECTIVE: Your target is Iron Guardian — a biotechnology firm with novel DNA-altering technology funded by anonymous shell corporations linked to nation-states with a history of committing war crimes. Utilizing a compromised AI bot, your team will hack into Iron Guardian and find data that can undermine its gene-editing technology.

LOGISTICS: This is an eight-hour experience for teams of three or four participants. Teams will compete against one another for points. The team with the most points at the end wins. Cyber Range is hosted in WWT's Advanced Technology Center (ATC) and has been built to accommodate even the most complex and demanding security environments.
